WORK EXPERIENCE

QBE Insurance Group
Digital Innovation Lab Intern   *May 2017 - August 2017*

Conducted experiments with the latest technological advancements in order to provide accurate insurance benefits for customers worldwide:
- Followed the Agile Software Development process in two projects with a team of interns and full-time employees.
- Used Xcode and Swift to program an application that obtained data from a drone. This data was used to determine a flying score to better determine insurance rates on commercial drones.
- Used Python and PythonOBD (On-Board Diagnostics) to obtain information from a vehicle for interpretation. The information was used to calculate a driving score depending on the driver's habits when operating the vehicle.

The International Division
Web Developer/Graphic Designer   *July 2015 - November 2015*

- Managed multiple websites using Wordpress which included the main website as well as the websites of satellite departments under the International Division.
- Edited photos using Adobe Photoshop to maximize the use of every pixel when displayed on the web.
- Created flyers and information pamphlets using Adobe Illustrator and Adobe Photoshop to promote events held by the International Division.
- Maintained and promoted The International Division's mission through social media on a daily basis by updating the website and using social media to reach a mass amount of students throughout campus.

The Wisconsin Union
Lead Building Manager   *October 2015 - Present*

- Oversee building operations between Memorial Union and Union South.
- Facilitate audio and video configurations for events, customer relations, individual business unit support, and building and patron security.
- Manage 11 student employees who also oversee operations and events throughout both Unions.
- Conduct prospective employee interviews, advise hiring, and train new student employees.
- Work closely with the Operations Manager in order to provide patrons with an excellent Wisconsin Union Experience.
